INTRODUCTORY REMARKS.

Forest Nursery is situated near Fairview, Todd Co., Kentucky, on a part of the old military survey, known as Croghan's Grove.

No section of country is better adapted to the growth of fruit and ornamental trees than this. The soil is naturally rich and productive, not requiring strong stimulating manures to bring the trees into market at the usual age for planting.

This nursery was established in 1834, and is now perhaps the oldest one in the western country.

The senior partner of this establishment having devoted some thirty-six years to the cultivation of fruits and fruit trees at Forest Nursery, feels himself fully competent to judge of the comparative merits of the various fruits in the South, as well as other portions of the country. We therefore offer to our customers the advantages of this life-long experience.

No pains nor expense has been spared to obtain all new fruits of reputation, which are carefully tested on our own grounds before recommending them to our patrons.

We are determined fully to maintain our former reputation for care in selecting, and success in packing, all nursery stock ordered of us; and with confidence claim more than ordinary correctness in nomenclature.

Thankful for the liberal patronage heretofore bestowed, we solicit a continuation of the same, and hope by renewed efforts on our part to merit and receive a liberal share of the patronage of the whole country.

J. S. DOWNER & SONS,

Fairview, Todd Co., Ky.
NOTICE TO CORRESPONDENTS.

All orders should be plainly written out in a list, and not mixed up in the body of the letter.

Orders from unknown correspondents must be accompanied by cash, or satisfactory reference.

It is desirable that all orders should be sent in early, and for those from the southern states, it is essential to their success.

Explicit directions for marking, and shipping packages should accompany each order. Where it is left to us to choose the mode of conveyance, we will exercise our best judgment; but in all cases the articles are at the risk of the purchaser after delivery at our shipping point, and if delay or loss occurs, the forwarders alone must be held responsible.

Purchasers that desire it will be furnished, free of charge, with full directions for planting and training young fruit trees.

Those of our patrons not familiarly acquainted with the fruits of the country, are advised to leave the selection of varieties to us, as our familiarity with them, will enable us to select such as are adapted to the locality.

DISTANCES AT WHICH TREES SHOULD BE PLANTED.

Apple trees from 30 to 40 feet, according to the fertility of the soil; trees requiring a greater distance on rich than poor soils. Standard pear trees from 20 to 25 feet. Dwarf pears from 10 to 12 feet. Peach trees should be planted from 15 to 20 feet, and kept headed in.

NUMBER OF TREES OR PLANTS ON AN ACRE, AT GIVEN DISTANCES APART.

SELECT APPLES.

The senior partner of Forest Nursery has devoted nearly forty years of his life to the cultivation, examination and comparison of all classes of fruits, and the following list of select apples is the result of his life-long labors in this department of Pomology.

Since the publication of the last edition of our catalogue, many changes in our list of select apples have been made. A few varieties, once popular, that now seem to be on their retrograde march, have been discarded, and quite a number of newer ones, the further trial of which has proved them to merit such a position, have been added to the list.

It is hoped this list will be found both useful, and convenient to beginners in fruit culture.

PRICE OF TREES, $20.00 PER HUNDRED.

Summer Apples.

American Summer Pearmain—Medium size, oblong; skin smooth, greenish, covered with stripes of dull red; flesh remarkably tender, juicy, rich and pleasant. The tree is a slow grower, and rather a shy bearer.

Aromatic—Fruit large, light yellow, slightly streaked with pale red; flesh moderately firm, mild, sub-acid, juicy, pleasant, and very good. Tree rather spreading in habit, but a vigorous grower and an early bearer.
Bohannan—Fruit large, fine yellow at maturity, with blush next the sun; flesh fine grained, tender and juicy, with a mild pleasant sub-acid flavor. Tree a rather slow grower in the nursery, but makes a large, handsome orchard tree.

Cornell's Favorite—Fruit medium size; skin a delicate greenish-yellow; flesh fine grained, tender, mild sub-acid, juicy and very pleasant. Tree a good grower, and quite productive.

Early Harvest—Fruit medium to large; skin smooth and glossy, pale yellow or straw color when fully ripe; flesh white, tender and juicy, with a rich, pleasant sub-acid flavor. Tree rather a slow grower but a good bearer.

Early Joe—Fruit medium or below, skin smooth, yellowish, striped with red; flesh mild sub-acid, white, tender, juicy and very pleasant. Tree a slow grower, but very productive.

Early Sweet Bough—Fruit large, skin pale greenish yellow; flesh white, tender, juicy, rich, sweet and very good. With us the tree is rather a poor grower and long in coming into bearing.

Georgia June, RED JUNE—Fruit medium or below; skin smooth and usually covered with a rich, red color, flesh very white, tender and juicy, with a rather sharp sub-acid flavor.

Garretson's Early—Fruit large; skin smooth, greenish yellow; flesh white, mild sub-acid, tender, juicy and very good. Tree an early and abundant bearer and holds its fruit well.

Herr's June, Striped June, VIRGINIA JUNE—Fruit large; skin white, much covered with stripes of bright red; flesh white, tender, juicy, moderately rich for an early apple and good. Tree is a handsome upright grower, and productive after it attains sufficient age.

Horse Apple—Fruit large to very large; skin pale yellow; flesh firm, rather coarse, juicy, a sharp sub-acid. This fruit is valuable for drying and for culinary purposes in general, but is too acid for the table. Tree a good grower and very productive.

Jersey Sweeting—Fruit of medium size; skin greenish yellow, striped with pale red; flesh white, fine-grained, tender, juicy, sweet and very good. Tree a strong, vigorous grower, and an early and abundant bearer.

May Apple, EARLY MAY—Fruit below medium; skin greenish white; flesh white tender, juicy, sub-acid and pleasant. This apple is valued mainly for its early ripening. Tree a good grower and attains large size. It is also very productive.

Pound Royal—Fruit large; skin pale, greenish white; surface smooth; flesh white, fine grained, tender, rich, juicy, mild sub-acid and very pleasant. One of the best of its season.

Pumpkin Russet—Fruit very large, skin a rich yellow at maturity, slightly russeted; flesh not very juicy, but sweet, rich and pleasant. Tree a strong vigorous grower, and moderately productive.

Red Harvest—Size full medium, skin a greenish white, much covered with dark red; flesh white, fine grained, tender, very juicy, sub-acid; this variety is closely allied to the Red or Georgia June, but is larger, and more handsome in appearance.

Sops of Wine—Fruit medium to large; skin yellowish, shaded and striped with red; flesh white, not juicy, mild, almost sweet, and good. Tree a handsome grower and early bearer.
Summer Rose—Fruit full medium; skin smooth, white, with a beautiful blush next the sun; flesh very tender, juicy and pleasant. One of the best of its season. Ripening throughout August.

Stribling—Fruit large, rather oblate; skin greenish white, striped and shaded with red; flesh tender, juicy, mild sub-acid and very pleasant. Tree a good grower and early bearer.

Tufts—Fruit large, irregular in form, skin white, much covered with red; flesh tender, moderately juicy, mild sub-acid, and very good. Tree a vigorous grower and very productive.

William’s Favorite—Fruit large and handsome, skin yellow, striped with light and dark red; flesh yellowish white, fine grained, mild sub-acid, tender, rich, juicy and excellent.

White Sugar—Fruit rather large, skin white, sometimes with patches of russet; flesh white, tender, rich, sweet, juicy and very pleasant. This is one of our most valuable apples of its season.

Autumn Apples.

Autumn Strawberry—Fruit medium size; skin yellowish, mostly covered with stripes of pale and dark red; flesh yellow, very tender and juicy, with a mild pleasant, sub-acid flavor.

Baldwin—Fruit large; skin yellowish in the shade, but almost covered with red in the sun; flesh yellowish white, mild sub-acid, rich and juicy, with a pleasant, spicy flavor. Tree a handsome and vigorous grower and productive, alternate seasons.

Bachelor, or RED LADY FINGER—Fruit large, conical; skin yellowish, much covered with red; flesh white, very tender and juicy, with a pleasant sub-acid flavor. Tree a handsome grower.

Fall Queen, or LADIES’ FAVORITE—Fruit large to very large; skin greenish yellow, mostly covered with shadings and stripes of pale and deeper colored red; flesh mild sub-acid, tender, juicy and very pleasant. One of the very best apples of its season with us.

Fall Jennetting—Fruit large; skin pale, greenish yellow, much covered with dull red, becoming darker next sun; flesh mild sub-acid, moderately rich, tender, juicy and very productive. Tree a vigorous but not handsome grower.

Hoover—Fruit large, skin yellowish, mostly overspread with red; flesh yellowish, rather firm, rich, juicy sub-acid, and very good. Tree a moderately good grower, but not very productive.

Jewett’s Fine Red—Fruit medium size; skin greenish white, striped and shaded with crimson; flesh tender, juicy, very pleasant, almost sweet, and very good.

Long Pearmain—Fruit very large, conical; skin pale yellow, shaded with red; flesh yellowish, tender, juicy, and pleasant. Tree a handsome upright grower, and good bearer.

Mangum—Fruit medium, oblate; skin yellowish, striped, and shaded with red; flesh yellow, mild sub-acid, very tender, juicy, slightly aromatic and pleasant. Tree a handsome grower and very productive.
Norton's Melon—Fruit large; color pale yellow, nearly covered with stripes of pale and darker red; flesh white, very tender, juicy, rich and exceedingly pleasant. Tree rather a slow grower, but hardy and very productive.

Peck's Pleasant—Fruit very large; skin smooth, and at maturity a bright yellow; flesh yellowish, fine grained; mild sub-acid, juicy, tender, and rich, with a delicious, high aromatic flavor. Nov. and Dec.

Wine Apple, or FALL WINE—Fruit large; skin yellow, beautifully striped with red; flesh yellowish white, mild sub-acid, juicy, tender and pleasant. Tree is not long lived in this country.

Yellow Belleflower—Fruit very large, oblong; skin smooth, pale yellow, some times with a blush next the sun; flesh tender, and juicy; with a sprightly sub-acid flavor. Tree a vigorous grower.

Winter Apples.

Abram Apple—Fruit medium size, skin greenish yellow, shaded and striped with dull red; flesh firm, moderately rich, almost sweet and pleasant. Valuable as a long keeper.

Ben Davis—Fruit very large; skin smooth, yellow, striped and shaded with red; flesh white, mild sub-acid; tender, juicy and pleasant. One of our handsomest and most popular winter apples. Tree a good grower, and succeeds best on sandy soils.

Bledsoe Pippin—Fruit large to very large; skin greenish yellow, rarely striped; flesh white, fine texture, crisp, juicy, with a mild, pleasant sub-acid flavor.

Buff—Fruit large to very large; skin yellowish white, mostly covered with broad stripes of dark red; flesh white, a little coarse, mild sub-acid, moderately juicy and pleasant. Southern.

Cullausaga—Fruit large; skin pale yellow, shaded and striped with red, flesh yellowish, mild sub-acid, moderately juicy, firm and very good. Tree a good grower and quite productive.

Cannon Pearmain—Fruit medium to large; skin yellow, striped and shaded with red; flesh yellow, firm, with a rich, pleasant sub-acid flavor. Valuable for its long keeping qualities.

Crawford's Keeper—Fruit large, color light yellow, mostly covered with a rich red, flesh a yellowish white, mild, sub-acid, tender, moderately juicy and very good.

Columbia Russet—Fruit large; skin smooth, greenish yellow, overspread with russet; flesh yellow, fine grained, rich, moderately juicy, mild sub-acid and very good.

Dr. Fulcher—Fruit medium; skin yellowish, striped and marbled with red, flesh yellow, fine grained, mild sub-acid, tender, very juicy, rich and excellent.

English Russet—Fruit of medium size; skin pale greenish yellow, mostly covered with russet; flesh yellowish, mild sub-acid, firm, not very juicy, but pleasant and very good.

Grimes' Golden—Fruit of medium size; skin a rich golden color, flesh yellow, rich, tender, juicy, sub-acid, and very good.
Green Cheese—Fruit medium to large; skin greenish yellow; flesh yellowish white, tender, juicy, moderately rich, mild sub-acid, and very pleasant. A fine keeper and one of our most valuable winter apples.

Holly—Fruit medium size; skin yellow, mostly covered with stripes of red; flesh yellow, moderately firm, rich, tender, and juicy, with a mild sub-acid and pleasant flavor.

Hatcher's Seedling—Fruit medium size; skin very dark rich red, with a purplish tinge; flesh yellow, fine grained, mild sub-acid, or almost sweet, juicy, pleasant, and very good. A valuable long keeping apple. Our trees of this sort are only one year old.

Hall's Seedling, or HALL'S RED—Fruit below medium; skin yellowish, smooth, mostly covered with stripes and shadings of red; flesh yellowish, fine grained, rich, tender and juicy, with a pleasant and high aromatic flavor.

Johnston's Winter—Fruit of medium size, conical; skin white, shaded with patches of russet; flesh compact, a little coarse and unpleasant, but tree is hardy, and the fruit keeps long. It is also valuable for winter or spring cider.

Kentucky Cream—Fruit medium to large; skin yellow, very smooth and glossy, much covered with shadings of bright red; flesh yellow, rich, mild sub-acid, pleasant and very good. Succeeds best on dry thin soils.

Kentucky Longstem—Fruit medium to large; skin pale greenish yellow, striped with red; flesh white, fine grained, tender, juicy, mild sub-acid, and very pleasant. Succeeds best on dry sandy soils.

Kinnard’s Choice—Fruit of medium size; skin yellow, almost covered with dark rich red; flesh yellowish, fine grained, rich, tender, juicy, mild sub-acid, and very pleasant. A valuable Tennessee apple.

Lady Apple—Fruit quite small; skin smooth and glossy, with a bright red cheek; flesh white, tender, crisp, and juicy with a pleasant flavor.

Large Striped Winter Pearmain—Fruit very large; skin yellow, striped and shaded with red; flesh yellow, crisp, juicy, tender, with a mild, rich pleasant sub-acid flavor. This variety also succeeds best on thin sandy soils.

Mountain Pippin or ALBEMARL or VA.—Fruit of medium size; skin green at first, but becomes a rich yellow at maturity; flesh, rich, tender, juicy and very pleasant.

Maverack’s Sweet—Fruit large; skin yellow, shaded with red; flesh yellowish, rich, tender, sweet, moderately juicy, and very good. Tree a good grower and early bearer.

Maxey—Fruit medium or a little above; skin greenish yellow, with stripes and shadings of red; flesh whitish; moderately juicy, mild, sub-acid, tender and very pleasant.

Mala Carle—Fruit, form medium to large; skin greenish, smooth, with a glossy appearance; flesh white, tender; moderately juicy, almost sweet, with a delicate aromatic flavor.

Milam—Fruit of medium size, or a little below; skin greenish yellow, shaded and striped with red; flesh rather firm, with a mild and pleasant sub-acid flavor. Tree rather a shy bearer.

Nickajack—Fruit large; skin greenish yellow; striped and shaded with pale and deep red; flesh yellow, rather compact; but mild, juicy and very pleasant.

Pennock, or LARGE ROMANITE—Fruit large to very large, skin yellow, mostly covered with a deep shade of red; flesh yellow, almost sweet, tender, juicy and pleasant.
Press Ewing—Fruit medium; skin yellow, shaded and striped with dull red; flesh yellowish, fine grained, tender, rich, juicy, and very pleasant. Succeeds best on high lands.

Pryor’s Red—Fruit medium or above; once of fine quality but of latter years has become diseased, and it is not now advisable to plant it extensively in this part of the country.

Rawle’s Janet—As stated in our last edition, this apple is too well known to need any description here. We will state, however, that it cannot long stand neglect. With good cultivation it has but few equals, but if neglected, soon becomes worthless.

Red Cedar—Fruit rather small; skin dark red; flesh yellowish, compact, mild sub-acid, rich and pleasant. Valuable for its keeping qualities, and for winter cider.

Red Jewel—Fruit medium or a little below; skin a dark rich crimson; flesh yellowish, firm, rich, juicy and very pleasant. One of the handsomest and most valuable long keeping apples known in this part of the country. Price 40 cents each.

Renette Franche—Fruit medium size; skin greenish yellow, striped with dull red; flesh firm, compact, rich and very pleasant. A valuable long keeping variety.

Red Winter Sweet—Fruit of medium size; skin yellow, mostly covered with stripes of deep rich red; flesh yellow, rich, very sweet and pleasant. Valuable for cooking.

Rome Beauty—We have heretofore placed this variety in the class of fall apples, but further trial justifies us in placing it in our list of winter sorts. Fruit large, skin yellow, shaded and striped with bright red; flesh yellowish, tender, juicy, rich and excellent.

Shockley—Fruit below medium; skin yellowish white, much covered with bright red; flesh white, crisp, juicy, rich, sweet and very good. A valuable long keeping variety.

Smokytwig—Fruit medium; skin yellowish, mostly covered with stripes of rich red; flesh white, tender, juicy and very pleasant.

Vaughan’s Winter—Fruit large; skin yellowish white, striped and shaded with bright red; flesh yellowish, tender, juicy, sub-acid, and very good. Succeeds best on elevated situations.

Vandevere—Fruit of medium size; skin yellow, striped with red; flesh yellowish, compact, with a fine rich and mild sub-acid flavor. A long keeper, but shy bearer.

Winesap—Fruit of medium size; skin smooth, of a fine dark red color; flesh yellow, firm, crisp, with a rich sub-acid flavor. Tree a strong grower and very productive.

FOR WINTER CIDER.

Hewes’ Virginia Crab—Fruit quite small; skin greenish yellow, striped with dull red; flesh tough, astringent, and acid, but has few if any equeals, for making cider. Tree very productive.

Johnson’s Cider—Medium size, conical; skin greenish yellow, sometimes a red cheek; flesh like the above; is scarcely edible, but the tree is productive, and the fruit keeps long, and is excellent for cider.

Waugh’s Cider Crab—Fruit below medium; skin greenish white, a lively red in the sun; flesh firm, tough, and rather astringent until spring, when it becomes edible.
Apples for Ornament and Preserving.

PRICE, 50 CENTS.

Dean Crab—Fruit of medium size; skin of a greenish white color, dull red next the sun; flesh firm and astringent.

Exquisite—This is believed to be the most beautiful crab in cultivation. It is of large size, a brilliant scarlet color and excellent flavor. Ripe late in autumn or early winter.

Hyslop Crab—Fruit very large; skin deep crimson color; popular at the west on account of its size, beauty and hardiness.

Lady Crab—Beautiful, resembling the Lady Apple. Fruit small, skin a rich, dark red; flesh mild sub-acid, and pleasant.

Large Yellow Crab—Fruit large, oblate; skin a beautiful waxen yellow, sometimes with stainings of red next the sun.

Malus Coronata, or WILD CRAB—The delightful fragrance of the flowers of this crab, is rarely equaled.

Oblong Crab—Fruit of medium size; skin of greenish white, shaded with red next the sun; handsome and good.

Red Siberian Crab—Fruit rather small; skin yellowish white, red next the sun; flesh handsome and pleasant.

Transcendant Crab—Fruit large; skin red and very handsome. The most desirable apple of this class that has fruited with us.

Walter’s Sweet Crab—Fruit of large size, handsome, and of excellent quality; flesh pleasant and sweet without astringency.

Whitney’s Winter Crab—Size medium; skin greenish yellow, covered with light red; flesh white, fine grained, juicy and pleasant.

Whitney’s Large Desert Crab
Whitney’s No. 1.
Whitney’s No. 2. New sorts of high reputation.

In addition to the above named, we have the following kinds of crabs, which are, however, used more for ornament than use.

MALUS MAXIMA, or large FRUITED,
NIGRA or PERPUREA,
BLACK FRUITED,

Miero Carpa, or currant CRAB,
Striata, or striped FRUITED, &c
Additional List of Apples.

After discarding some of the more indifferent varieties of apples, and adding such others as have attracted our attention, we offer the following list. Some of them are promising, others not yet tested, while many others are not worthy of general cultivation. Scions of all and trees of many of them can be supplied.

Summer Apples.

Astrachan Red—Large, red, very handsome, sharp acid.
Ashmore Red—Rather large, whitish yellow, shaded red.
Bracken Early—Medium size, yellow, handsome, like Early Harvest.
Beefstake—Medium size, yellow, shaded with red, juicy and good.
Blinkbonny—Medium size, pale yellow, sub-acid, good.
Bailey Sweet—Fruit large yellowish, shaded with red, very good.
Bevan’s Favorite—Fruit medium, yellow, striped with red, good.
Benoni—Fruit below medium, yellow, striped with red, good.
Carter Va.—Fruit below medium, white, juicy, sub-acid, good.
Candy Apple—Fruit large, greenish yellow, very sweet and good.
Curlese’s Sweet—Fruit medium, very white, sweet and good.
Chep de Vue—Fruit medium, dull red, compact, firm, good.
Cornfield Apple—Fruit medium, greenish white, very good.
Dana—Fruit medium, yellow, striped with red, good.
Duchesse of Oldenburgh—Medium size, yellow striped with red, good.
Early Chandler—Medium or below, yellow, shaded with red, good.
Early Pound—Fruit large, skin greenish yellow, sub-acid, good.
Early Pennock—Fruit large, yellow, shaded with red, sub-acid, good.
Early Strawberry—Fruit small, skin yellow, striped with red, good.
Estin—Fruit large, yellow, sometimes with a blush; juicy, good.
Flora (Southern)—Fruit medium, yellowish, shaded with red, good.
Gravenstein—Fruit large, yellow, striped with red, handsome, acid.
Golden Sweet—Fruit above medium, yellow, sweet, rich, very good.
Harned’s Sweet—Medium size, greenish yellow, sweet, juicy, good.
Horton’s Sweet—Medium size, skin greenish yellow, sweet, good.
Jeffries—Fruit medium, skin yellow, striped with red, very good.
Julian (Southern)—Size medium, skin whitish, striped with red, good.
July Branch—Fruit of medium size, whitish, striped with red, very good.
Keswick Codlin—An old English variety, of but little value here.
Lackey’s Sweet—Size medium, skin green, flesh sweet, and good.
Late Harvest—Fruit large, skin yellow, flesh sub-acid, good.
Large Honey Greening—Fruit large; skin green; flesh tender, juicy, and good.
Lyman’s Large Summer—Fruit quite large, yellow, sub-acid, good.
Lyscomb—Fruit large, skin yellow, striped with red, sub-acid, good.
Lowell—Fruit large, skin waxen yellow, flesh juicy, acid, good.
Matlock’s Summer—Fruit medium, white, flesh almost sweet, good.
Mammoth June—Fruit large, whitish, striped with red, acid, good.
Manomet—Fruit medium, fine yellow, red cheek, very good.
Northern Sweet—Fruit medium, yellow skin, sweet, pleasant.
North Carolina Sweet—Fruit large, skin green, flesh rich and sweet.
Orne’s Early—Fruit large, white, flesh moderately tender, but acid.
Pine Strawberry (Southern)—Fruit large, pale yellow, striped with red, sweet, good.
Primate—Fruit medium, greenish white, flesh sub-acid, good.
Polly Bright—Fruit large, yellow, striped with red, acid, good.
Pear Apple—Fruit medium, pale yellow, with blush, sub-acid, good.
Sawyer’s Sweet—Fruit large, greenish, with blush, sweet, good.
Summer Queen—Fruit large, yellow, striped with red, acid, good.
Summer Sweet Paradise—Fruit large, greenish, sweet and pleasant.
Summer Cheese—Fruit medium, greenish yellow, sub-acid, good.
Summer Seek-no-further—Fruit large, greenish, striped with red, good.
Summer Red—Fruit medium, skin white, red cheek, acid.
Summum Bonum—Fruit large, yellow, striped with red.
Spice Apple—Fruit medium, yellow, tender, juicy and pleasant.
Shanklin’s Summer—Fruit large, whitish, tender, juicy, sub-acid.
Shirley—Fruit above medium, greenish, striped with red, good.
Sweet June, or HIGHTOP SWEET—Medium size, yellow, flesh sweet, good.
Tandy’s Sweeting—Fruit below medium, white, striped red, sweet.
Tenderskin, (Southern.)—Fruit medium, skin yellow, striped with red, good.
Toole’s Rareripe—Fruit large, skin greenish yellow, flesh tender, good.
Townsend—Fruit medium, skin yellow, striped with red, pleasant.
Tocooa, (Southern.)—Fruit medium, skin yellow, red cheek, sub-acid, good.
Virginia Quaker—Fruit small, greenish yellow, sub-acid, good.
Watson’s Dumpling—Fruit large, greenish.  An English cooking apple.
Wonder, (Southern.)—Fruit medium size, yellow, beautifully striped, acid.
Yellow Pumpkin Sweet—Fruit large, yellow, rich, sweet and good.
Yellow Surprise—Fruit small, skin yellow, flesh striped red.

Autumn Apples.

American Golden Russet—Fruit medium, yellow, flesh rich, very good.
Alexander—Fruit very large, greenish, striped with red, handsome.
Autumn Swaar—Fruit large, yellow, flesh yellow, juicy, pleasant.
Bell’s Seedling—Fruit large, skin yellow, beautifully striped with red.
Blue Pearmain—Fruit very large, greenish, striped with red, good.
Buckingham—Without doubt this is the same as the Fall Queen.
Buckman, (Southern.)—Fruit medium or below, yellow, mostly covered with red.
Broadwell—Fruit medium, skin pale yellow, flesh sweet and good.
Buncombe—We believe this to be a synonym of the Red Lady Finger, good.
Cooper—Fruit large, skin greenish yellow, flesh tender, and juicy.
Cogswell—Fruit medium, yellow, striped with red, juicy and good.
Cornish Gilliflower—Fruit medium, skin yellowish, flesh sub-acid.
Cullawhee—Fruit above medium, skin yellow, striped with red.
Cole's Quince—Fruit large, skin yellow, flesh juicy, sub-acid, good.
Cracking—Fruit large, skin pale yellow, flesh sub-acid, good.
Celestia—Fruit large, color pale yellow, flesh juicy and pleasant.
Champlain—Fruit large, color pale yellow, flesh tender and juicy.
Duerson's Carter—Fruit medium, skin greenish, flesh pleasant.
Drap d'Or—Fruit large, skin smooth yellow, flesh juicy and good.
Danver's Winter Sweet—Fruit medium, skin yellow, rich, sweet and good.
Disharoon, {Southern.}—Fruit medium, greenish white, flesh juicy and good.
Dahlonega {Southern.}—Fruit medium, skin green, shaded with red.
Dyer, or POMME ROYALE—Fruit medium, skin green, shaded with red.
Domine—Size medium, skin pale yellow, flesh tender and juicy.
Equinetely, {Southern.}—This too, is believed to be the same as Fall Queen.
Esopus Spitzenberg—Fruit large, skin yellowish, flesh juicy and good.
Episcopal—Fruit large, skin yellow, flesh juicy, pleasant and good.
Fallawater—Fruit very large, skin yellowish, flesh juicy and good.
Fall Greening—Fruit small, skin green, flesh tender, and very juicy.
Fall Red—Fruit large, skin greenish, striped with red, good.
Fall Pippin—Fruit quite large, skin bright yellow, flesh juicy and good.
Fall Orange—Fruit large, skin pale yellow, flesh juicy, sub-acid, and good.
Fulton—Fruit medium, yellow, flesh juicy, sub-acid, and good.
Gate, or BELMONT—Fruit medium, skin light yellow, flesh good.
Goff's Sweet—Fruit medium, skin greenish white, sweet, good.
Golden Ball—Fruit large golden yellow, flesh tender, juicy and good.
Golden Apple—Fruit large, yellow, flesh sub-acid, juicy and good.
Green Winter Sweet—Fruit below medium, skin greenish, sweet and good.
Hawley—Fruit large, skin yellow, flesh tender, juicy and good.
Hawthornden—Fruit above medium, skin pale yellow, sub-acid.
Haskell Sweet—Fruit medium, skin greenish, flesh sweet, firm.
Holland Pippin—Fruit large, skin yellow, flesh rich, sub-acid, good.
Hubbardston Nonsuch—Fruit large, yellowish, striped with red, sub-acid, good.
Jonathan—Fruit of medium size, skin a lively red color, flesh sub-acid, good.
Kitchen Pippin—New and not tested by us—said to be valuable.
Kaighn's Spitzenburgh—Fruit large, yellow, shaded with red, sub-acid, good.
Lady's Sweet—Fruit large, skin greenish, striped with red, good.
Ledge Sweet—Fruit medium, yellowish, striped with red, sweet, good.
Long's Fall Pippin—Fruit medium size, skin yellow, striped with red.
Lady's Fancy—Fruit large, skin yellow, shaded with red, sub-acid, good.
Lady Blush—Fruit above medium, skin yellowish, shaded with red, good.
Maiden's Blush—Fruit of medium size, skin white, with a blush.
Mammoth Pippin—Very large, greenish white, flesh coarse, sub-acid, good.
Mott's Mammoth—Fruit large, skin greenish, striped with red, sweet, good.
Mouse Apple—Fruit large, skin pale yellow, flesh tender, and juicy.
Marstone's Red Winter—Fruit medium, skin yellowish, striped with red, acid.
Mother—Fruit medium yellow, shaded with red, flesh juicy and good.
Minister—Fruit large, skin greenish yellow, striped with red, flavor good.
McLellan—Fruit large, skin yellow, shaded with red, flesh juicy and good.
McLoud’s Family—Fruit medium, skin yellow, striped with red, good.
Mount Pleasant Sweet—Fruit below medium, greenish, sweet, good.
Mexico—Fruit medium, yellow, shaded with dark red, flesh juicy and good.
Mote’s Sweet—Fruit large, skin pale yellow, tinged with red, flesh very good.
Maryland Beauty—Fruit medium, skin white, shaded with red, good.
Northern Spy—Fruit large pale yellow, striped with red, good.
Petree’s Favorite—Fruit rather small, yellowish red, rich, juicy and good.
Polly Bright—Fruit large, yellow, striped with red, juicy, sub-acid, good.
Pine Apple Russet—Fruit medium, skin yellowish, flesh firm, acid.
Pomme Grise—Fruit small, skin greenish, flesh juicy and good.
Progress—Fruit medium, skin smooth, yellow, flesh tender and juicy.
Paterson’s Sweet—Fruit large, skin yellow, shaded with red, flesh sweet and good
Rambo—This was once a popular apple here, but seems to have failed latterly.
Robertson White, Va.—Fruit medium, skin greenish, flesh sub-acid, good.

Yellow Crank—Without doubt this is a synonym of Green Cheese.
Yopp’s Favorite (Southern)—Fruit large, yellow with a blush next the sun, good.
Yahoola (Southern)—Fruit medium, yellowish green, juicy, and good.
SELECT PEARS.

The greatly increased demand for the trees, is sufficient evidence of the growing popularity of this fruit. It has proven itself to be as hardy, and as reliable as the apple, and less liable to injury from the attacks of insects. Then too, the blight, one of the great drawbacks, to successful pear growing in this part of the country, seems to have disappeared, as we have seen but one case of it in the past ten years.

Standard trees are best suited for orchard culture, and Dwarfs for the garden.

Summer and autumn pears should be gathered some eight or ten days before they are ripe. Winter pears may be allowed to remain on the tree until frost.
Summer Pears.

PRICE OF PEAR TREES.
FROM 50 TO 75 CENTS EACH, ACCORDING TO SIZE, &C.

Ananas d'Ete—Large, pale yellow; flesh fine-grained, buttery, melting, sweet and very good. Ripe here last of Aug.

NOTE—A part of the above named pears are new and untested here, and we will propagate such but sparingly; aiming to sell mainly of the well known and popular varieties, and these will be worked on pear, or quince stock, as best suit the kind.
SELECT PEACHES.

We have made, as we trust, considerable improvement in our list of select peaches, since the publication of the last edition of our catalogue. After careful and often repeated examinations and comparisons, the annexed varieties have been selected from a list of some 250 of the most popular sorts known in the country; and it is composed of such as ripen in regular succession from the 10th of July until Nov. 1st.

PRICES OF PEACH TREES.

25 CENTS EACH, AND $20.00 PER HUNDRED.

List of Varieties.

Admiration—Fruit very large, nearly round; skin white, with a red cheek; flesh juicy, rich and excellent. Free.

Amelia—Fruit very large; skin greenish white, red cheek; flesh white, melting, juicy and rich. One of the best. Free.

Binford—Fruit large. This peach is one of the White Heath type, and ripens about the same time of that variety, but is superior to its cling.

Crawford’s Early—Fruit large and handsome; skin yellow, with a fine red cheek; flesh yellow, melting, rich, sweet and excellent. Free

Crawford’s Late—Fruit very large; skin yellow, with a dark red cheek; flesh rich yellow, melting, juicy, rich and very good. Free.

Portugal—Fruit very large; skin of a light yellow color. The trees are not so productive as some other varieties.
Rea's Seedling—Fruit of the largest size; skin bright yellow. Tree thrifty, hardy, and moderately productive.
DESCRIPTIVE CATALOGUE.

New Seedling Strawberry.

DOWNER'S KENTUCKY.

After having fruited this splendid new strawberry on our own grounds for the past seven years with the most gratifying results, and having had it carefully tested by competent growers in some seven or eight different states, with uniform and perfect success, it is with entire confidence that we recommend it to cultivators generally throughout the country.

Mr. Wm. Parry, of New Jersey, a distinguished strawberry grower, is one of the number who tested this berry, and we here give his report, as published by a Philadelphia paper. "Plants strong, vigorous and very productive, with long fruit stalks, bearing the berries well up from the ground, and the foliage standing the heat of the summer, and cold of winter, and is a week later than most varieties."

Fruit large, to very large, roundish conical; bright scarlet; flesh white, firm, juicy rich, sweet and of excellent quality.

PRICE OF PLANTS—$1.25 per dozen. Per 100, $5.00 Per 1000, $30.00.

CHARLES DOWNING.

This, too, is a new seedling berry raised by us, and offered to the public for the first time in 1866 or 1867, and it is evident that no berry in the country, has ever acquired such a reputation in the same length of time. From Central New York, in the North, to
Columbia, Miss., in the South, it has no superior, and but few if any equals, except in one quality of the Wilson, which is its value for shipping to distant markets.

Those wishing plants of this berry true to name, will do well to call on the originators.

**PRICE OF PLANTS**—Per dozen, by mail, 75 cents.

“ “ “ 50 cents.

100, $2.50. Per 1000, $12.00.

Those wishing other varieties of the strawberry, are referred to our new Strawberry Catalogue, which will be sent to all applicants, free of charge—a two cent stamp to pay the postage, not rejected, however.

---

**Gooseberries.**

**PRICE**—25 cents each. Per dozen, $2.50.

- **American Seedling**—Fruit small; plants strong growers, and very productive.
- **Crown Bob**—Fruit large, oblong; but subject to mildew here.
- **Downing’s Seedling**—Fruit above medium; and as grown here, superior to all other varieties in point of freedom from mildew, pleasant flavor, productiveness of plants, &c.
- **Green Walnut**—Fruit medium, flavor very good; liable to mildew.
- **Houghton’s Seedling**—Fruit medium; not likely to mildew, very productive.
- **Manchester Red**—Fruit large, and very good; but sometimes mildews.
- **Red Warrington**—Fruit large, flavor very good; plants vigorous and productive.
- **White Smith**—Fruit below medium, flavor very good; plants productive.

---

**Currants.**

**PRICE**—15 to 25 cents each. $2.00 per dozen.

- **Black Naples**—Fruit large, black; plants vigorous and productive.
- **Bang-up-Black**—New with us, but represented as large and valuable.

ORNAMENTAL DEPARTMENT.

Evergreen Trees.

PRICES OF TREES—1 foot, 25 cents; 1½ feet, 50 cents. 2 feet, 75 " 2½ " 1.00 "

Extra specimens charged for in proportion to value.

Austrian Pine—A rapid grower; perfectly hardy, and distinct. American, or WHITE SPRUCE—A slow grower; but hardy, and handsome.
Arbor Vitæ — American, Siberian, Austrian, and some other sorts.

Balsam Fir — This beautiful tree is a favorite with all planters of evergreens.

Black Spruce — A good grower; quite hardy, and distinct.

Golden Arbor Vitæ — One of the most beautiful of this family. $1.00.

Hemlock Spruce — Rather slow in its growth, but hardy, and handsome.

Holly (American.) — Very slow grower, and difficult to transplant; but finally becomes one of the most beautiful trees in the country.

Juniper — Swedish, Irish, English, and some other sorts.

Lawson's Cypress — This new and beautiful evergreen, seems to be quite hardy here, and if so, is a great acquisition.

Mountain Pine — This is rather dwarfish in its habits, but handsome.

Magnolia Grandiflora — This splendid tree is not perfectly hardy here.

Magnolia Hybridia — This seems to be a cross between the Glauca, and Grandiflora, and is entirely hardy, retaining its foliage well through winter, and flowering abundantly through summer. For this latitude it is greatly superior to any other of this family. 2 year seedling 25 cents.

Norway Spruce — Too well known to need a remark.

Sea Pine — A very handsome and rapid growing tree. (New.)

Scotch Pine — Perfectly hardy, and when given sufficient space, becomes handsome.

White, or SILVER PINE — This tree is entirely hardy, and quite handsome.

Yellow Pine — This tree is quite hardy and of rapid growth.
Deciduous Trees.

PRICE—50 cents to $1.00 each.

Bird Cherry—A beautiful tree, with long branches of white flowers in the spring. 75c

Cypress, (Common deciduous)—A fine tree, with handsome foliage. 75 cents.

Horse Chestnut—Red Flowering—is a small tree, having an abundance of crimson flowers during early spring; and is one of our handsomest ornamental trees. 50 cts.

“ “ White Flowering—A very handsome tree; perfectly hardy, and producing an abundance of beautiful white flowers. 75 cents.

“ “ Ohio Buckeye—Hardy, and desirable on account of its coming into leaf so early in the spring.

Kentucky Coffee—A hardy tree, with beautiful feathery foliage.

Koelreuteria Paniculata—A tree of medium size, and quite handsome, having handsome foliage, and showy yellow flowers.

Larch, EUROPEAN—This is one of the handsomest, and most desirable of our deciduous ornamental trees.
Linden, EUROPEAN—Harly, handsome and desirable.
Maple—We have several varieties of this deservedly popular family of trees.
Magnolia Conspicua—A handsome Chinese tree, with beautiful white flowers.
Magnolia Acuminata—A fine tree, with very large and handsome foliage.

Macrophylla—A tree of medium size, and rare beauty; having leaves, and flowers, of enormous dimensions. Trees 2 years old, 25 cts.

Mountain Ash—A medium sized tree, with handsome foliage, and in autumn loaded with bright scarlet berries.

Purple Fringe, or SMOKE TREE—Medium size, and very handsome.

Salisburyia Adiantifolia—A beautiful tree, with handsome, distinct fan-like foliage.

Snow Ball—A Southern tree of great beauty, having handsome foliage, and in the spring loaded with flowers of snowy whiteness.

Sophora Japonica—A tree of medium size, handsome and distinct.

Virgilia Lutea—A beautiful tree, and although it is said to be a native of the mountainous parts of this state, it is quite rare.

White Fringe—A small tree, or large shrub, of rare beauty, having dark green leaves and delicate white flowers.

Willow—We have some of the leading varieties of this deservedly popular family of trees, including the Fountain, Golden, Ring-Leaved, Weeping, &c.

---

Hardy Evergreen and Flowering Shrubs.

Althea—Several fine varieties.
Box—Dwarf, Mammoth, English, &c.

Calycanthus—A sweet scented shrub.
Deutzia Scabra—A tall shrub.
Deutzia Gracalis—Very handsome.
Deutzia Crenata—Double flowering.

---

Climbing Shrubs.

Of these we have a fine assortment, including Honeysuckles, Woodbines, Wisterias, Iries, Clematis, &c. Price, 25 to 50 cents.
PRICE of Plants of medium size—35 to 50 cents. Larger ones at proportionate rates.

Our assortment of Roses is not surpassed in this country. It is composed of some 200 varieties, including the leading sorts of Hybrid Perpetual, Bourbon, Tea-scented, Moss, Bengall, Noisette, and Prairie Roses.
Chrysanthemums.
PRICE—25 to 50 cents.

We have given great attention to the cultivation of this class of flowers, for a few years past, and now have the finest assortment in the country; consisting of 75 varieties, including most of the splendid new sorts recently imported from China and Japan.

Hardy Herbaceous Plants.
PRICE—Mostly 25 cents.

Our assortment of this class of plants embraces almost everything usually found in a well regulated nursery establishment.

Bulbous and Tuberous Rooted Plants.
PRICE—10 to 25 cents each.

Most of our early Spring flowers will be found in this class; and our assortments of them are full and complete. We will name some of them. Crocus, Hyacinths, Lilies, Gladious, Amaryllis, Snowdrops, Tube-roses, Iris, Dahlias, &c.

Green House and Bedding Plants.

Our assortment of plants that naturally fall into this division, are sufficiently numerous to form a Catalogue of respectable dimensions of themselves, but in this edition we have only space to call attention to them, and to inform those wishing anything in this line, that our assortment is full and complete. Prices reasonable, and entire satisfaction guaranteed.
